I recommend u guys to give it a try if u miss old school horror game despite the game is short but i like the concept it remind me of my old days and i hope that the developers will add some more chapters in the next update

. This game is a godsend. I've played on another account before and decided to buy it again. The perfect mix between Advance Wars and Fire Emblem. Makes me feel like Wargroove got its idea from this lol. But in all seriousness, this is a fantastic Turn based strategy game.. all you can really do is change the water height and the temp of tthe place, not really worth this much that they are asking. This iz guud game 10/10 great story line. very rich color depth and + YOU CAN ADD YOUR OWN MUSIC TRACKS!
best gamez

10/10 Rated by Savage Pigeon

Much lazers/Such story/such muzik. I didn't make a mistake by purchasing this game because anything under \$10 means nothing to me. However, the money would have been better spent at McDonald's.. Short VN worth paying the full price. The story is simple and straight forward, no complex plot twists here. Even so, I had fun. Art style was okay (I found it interesting that all the characters are faceless; leaves everything to your own imagination), BGs were ok, BGM was nice. I also liked the VA a lot: I've played really expensive games with poor VA and this one, yet so simple and with a good price, has a great VA.

I hope to see more works from this developer soon!

8/10, because I wish this VN could be just a bit longer, haha.. The story felt a bit weak on this one. It felt very similar to Emily's games. I was expecting an adventure on a cooking school or something like that. Didn't really like any of the characters and the soundtrack is annoying.

It is a fun game still and I really liked the unlockable menus.. Not as good as minecraft storymode but its okay.. Dear People Who'd Like to Buy this Game

Please don't. The developer has not shown a single update since approx. April.

There is no one online.

When you set up matches with friends, the game cuts out mid match and you're stuck looking at each other.

Sorry guys.. I honestly think this game COULD and WOULD have been better than Guns of Icarus had Ludocraft actually stuck with it and supported it. That being said, the game is long dead and completely abandoned by the devs. It's a shame, really...

Worst 8 minutes of my life.... Amazing as a sequel just as good as the original. While it's an interesting story, and the fighting techniques are quite unique I did find one thing very annoying.... I couldn't adjust the resolution of the game. It came up in a tiny window on my screen and I had to adjust the resolution of my screen in order to make it bigger. There should definitely be some controls for making the game full screen built into the game. Also the movement is bound to the arrow keys instead of W,A,S,D, and doesn't allow for mouse clicks to make the game easier to navigate.

I do plan on putting some more time into the game to see more of the story, but I hope the developer will address these issues eventually to make it a more enjoyable experience. Otherwise the story and world development, and the mechanic for going back and forth through memories is quite enjoyable.. As with all hidden object games this can be infuriating at times but never to the point of completely giving up, well worth the money in my opinion.. i didnt like the way the game is played som may like it it. you have to try it to se if its for you. i refunded the game because was not what i expected. way to liner not my style of game sorry. I'm not sure what it is about this little indie puzzle game that I just love so much. Maybe because it has me thinking constantly on what to do at the situation before the time runs out?

It's a little hard to keep your eyes off the screen, even after you fail cause when you do, instantly it's all "YOU SUCK. YOUR TIME RAN OUT. HERE TRY AGAIN. LET'S GO LET'S GO."
