
Daisy's destruction video 42 Hi I am a U.S. soldier and my name is Conor, and this is my last day alive. I know a lot of people have asked me why I would do such an extreme thing as to kill myself on camera before having made any public statement about it or anything, so I'll try to break it down for you now:

1-The message: If you're not already scared of the police state and its growing influence in our lives, this should be enough to convince you that we need to mobilize and resist the increasing power that the government has over our lives. I hope that you are able to use this video as inspiration to combat the state's attempts at independence of our personal lives. I know that it may not be an easy thing to do, but any resistance is better than no resistance. I was once told by a great man who I can't quite remember who said "there is nothing more impotent than an American who is content". Even though this statement is completely contradictory to what he himself believed in, it still holds true for me today. The revolution has already begun, and if you wish to support this cause, refer to my youtube channel where you can find many videos on how we as Americans can resist the state. I hope that you can use my death as a way to inspire others to resist the government and hopefully put an end to its constant encroachment of our lives. 2-The gun: I am sure that many of you will wonder about the gun that I used today in this video. It is a .50 Caliber Desert Eagle, and is quite expensive at \$1000. The reason I chose this weapon was because it is powerful, and leaves a very distinct hole in the body. My goal was to make sure that there would be no doubt in anyone's mind about how serious I am about the issue of the state's control over our lives, and I hope that it has been accomplished with this video. 3-The execution: I have seen many videos on the internet where people have been executed for being political activists, and what most of them have in common is that they are all filmed from the point of view that they are facing death. I was not able to do this because my friend Zack, who took the video of me, was not quite willing to go through with it. I could have asked him to film me from another angle so that he would be looking at my back, but I decided against it because it still would have been a bit too close for comfort. So what this means is that if you don't believe me, check out Zack's video which can be found along with mine at the end of this article. 4-The police state: The main reason I have done this is because of the extreme amount of power that the government has over our lives. We are all slaves to it, and are not allowed to do anything that could possibly be considered illegal or immoral. We are all born with natural rights that cannot be given to us by our creator, but only taken away by the government through its unjust laws. 5-The death of democracy: If you don't think that we live in a fascist police state go ahead and try setting up an agricultural commune where you can practice free love and use psychedelic drugs without being arrested for it.
